You embarked on a mission with the <i>Master of Stars</i> and a small support fleet to investigate a rogue moon suspected of harboring a magitech superweapon, only to discover that the moon itself was a moon-sized fiendish earth elemental named Garako, bent on eating any stellar object or creature it came across! After exploring the subsurface, you attacked Garako's immune systems to open the way to its fiery heart, which you then sabotaged. While exploring Garako's innards, you ☐ rescued, ☐ failed to rescue, or ☐ did not meet the oread selamid Hekashaz. In a climactic battle, you teamed up with other Starfinders to defeat Dajagal, a Xenowarden who sought to protect Garako even at the cost of thousands of innocent lives, and their acolytes, including Brimora and Helsin. You ☐ spared or ☐ didn't spare any of their lives. After you made a daring escape, the fleet's orbital bombardment destroyed Garako before it could consume the populated planetoid of Pikora 317.
